## Work Experience

### Academic

- Currently working on mini-projects as part of Full Stack Development training
- Building hands-on experience with frontend and backend technologies

### Self-Initiated and Course Projects

- **Airbnb Clone:**
  - Developed a full-stack Airbnb web application using React.js, Node.js, Express.js, and MongoDB.
  - Implemented user authentication, property listing, and booking functionality with responsive UI.
- **Zerodha Platform (Ongoing):**
  - Working on a trading platform interface with React.js and API integration for live data visualization.
  - Focused on backend connectivity and improving dashboard performance.
- **E-commerce Website:(full stack)**
  - Developed a fully functional full-stack e-commerce web application that allows users to browse products, add items to cart, and place orders. Implemented both frontend UI and backend APIs with database integration.
- **Photography Website(Frontend)**
  - Designed and developed a responsive photography portfolio website to showcase images in an engaging and visually appealing layout with smooth scrolling effects.
- **To-Do List App:**
  - Developed a task management app using HTML, CSS, and JavaScript, allowing add/remove functionality and data persistence via localStorage.
